

A man with short dark hair, wearing a white button-down shirt and sunglasses, is smiling and looking at his smartphone. He is standing in a gym or fitness center, with several green treadmills visible in the background. The lighting is warm, suggesting an indoor setting with large windows or a well-lit area. The background is slightly blurred, focusing attention on the man.

Finally...a polarized
sunglass smarter
than your phone.

POLARIZED

BLUTECH[®]
LENSES

POLARIZED
POLY GRAY

POLARIZED
1.56 BROWN

Whether it's a phone, iPad, laptop, ATM or gas pump...those all go dark when viewed with ordinary polarized sunglasses. Not anymore. BluTech POLARIZED sunglasses combine a polarizer with natural pigments and dyes to ensure that whatever device you are viewing outside is, well...readable.

When to wear your POLARIZED sunglasses?

- Driving
- Poolside
- Outdoor Sport Activities
- Working Outside on a Laptop or Smartphone

How BluTech is different than typical polarized sunglasses

- ✓ Read devices comfortably outdoors
- ✓ Protection from glare and blue light
- ✓ Deep saturated colors; clarity and comfort
